1 Introduction

This document describes Cicero LMS' integration with STIL Infotjenesten. The document includes from where and when the integration is used.

The target group for this document is customers and users of Cicero LMS utilizing the infrastructure supplied by STIL.

2 Import Loaners

2.1 Purpose with the integration

The integration allows users of Cicero LMS to automatically synchronize the state of an institution's loaners with STIL. This is achieved by a scheduled job that for each branch with institutions having subscriptions to STIL imports loaners from that institution.

The service is provided by STIL.

2.2 Usage

Every time the scheduled task for importing loaners is triggered, the loaners are mainly received through this integration. Furthermore, an institution number, user and a password, are required parameters for the service to receive (operation: getData) the updated list of loaners for a specific institution.

The user needs to enable the loaner import job from Cicero LMS for the agency after setting the institution number.

For configuration of the service, please refer to [USM0007]

2.3 Error Scenarios

The integration is used in a scheduled task so if the service is not available then the error handling strategy "Scheduled import of data from external system" described in [SDD0003] applies.

2.4 More information

For a more detailed description of the service, see STILS' documentation: <https://viden.stil.dk/pages/viewpage.action?pageId=2360669>
